

I/DD Solutions

*End-to-End Support Specifically
Designed for I/DD Providers*

Sandata's solution is built on decades of experience serving intellectual and developmental disabilities (I/DD) providers and designing software to meet their specific needs. We understand how sudden rule changes, complex operational requirements and improving ROI are constant challenges. Spend more time on individual support and less on administration with our industry-leading I/DD agency management platform.

Through streamlining administrative work, agencies increase revenue while delivering high-quality care to vulnerable populations. Scalable, configurable, and compliant, our I/DD agency management solution checks all the boxes for every workflow and every aspect of your business.

"Our long-term relationship with Sandata is rooted in their understanding of I/DD providers' needs. We're confident that we will continue to find operational efficiencies and they will continue to innovate throughout our partnership with them."

Key capabilities include:

▶ One end-to-end platform

Our system is built to be the only one your team needs with Single Sign-On capabilities.

▶ Data at your fingertips

With employee care and client care modules, you and your team can improve the quality of life for the individuals you serve.

▶ Time Tracking, Staff Scheduling, and EVV

With features like auto-scheduling and point-of-entry validation to eliminate errors, our secure, HIPAA-compliant web-based tool increases productivity for DSPs and managers.

▶ Client Care & Support

Your clients get support they need to track plans, goals, assessments, and the ability to document results and incidents.

▶ Billing & Cashflow

Our billing capabilities provide all the information you need to easily manage your accounts receivable, general ledger, and payables, all in one system.

▶ Employee Care

We empower your staff from hiring and onboarding, to training and credentialing, ensuring the best qualified staff are scheduled for each appointment.

▶ Payroll (add-on)

We can support all payroll needs, including wage calculation, varied payroll costs, and batch wage processing and reimbursements. Plus, a 24/7 Payroll Services Team to address issues and prevent interruptions.

▶ Business Intelligence for I/DD

Easily access data and analytics to optimize operations, drive revenue, and enhance care delivery:

- Individual Lifecycle
- HR Management & Staff Compliance
- Billing & Finance
- Operations
- Incident Tracking

The Sandata difference

With over 40 years supporting agencies, providers and payers across the country, Sandata brings experience, innovation, and a customer-centric approach that makes it possible to get more right from the start.
